By leveraging our enhanced R&D capabilities in the third quarter, we launched our A1246 product series, which continues to lead the industry with its energy efficiency, computing power, and unit cost. In addition, we have also accelerated the monetization of our AI business through our partnerships with a number of companies in various industries, such as online education and smart city solutions. In the third quarter of 2020, for example, we implemented our K210 AI chips in hardware sensors from our partner to better ensure the proper execution of social distancing practices in response to the outbreak of COVID-19. With new generations of mining machines and AI chips in the pipeline, we are confident that the enhanced performance of our new products will continue to bolster our competitive advantages and solidify our market leadership going forward."

However, the demand for mining machines in the market continued to rebound during the third quarter, and we have received a large number of pre-sale orders which are scheduled for delivery starting in the fourth quarter of 2020. Looking ahead, we remain committed to investing in areas that will further strengthen our collaboration with established IC manufacturers, enhance our inventory management, streamline our research and development initiatives, and generate lasting value for our shareholders."

Safe Harbor Statement

This announcement contains forward-looking statements. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates" and similar statements. Among other things, the business outlook and quotations from management in this announcement, as well as Canaan Inc.'s strategic and operational plans, contain forward-looking statements. Canaan Inc. may also make written or oral forward-looking statements in its periodic reports to the U.S. Securities and Exchange Commission ("SEC") on Forms 20-F and 6-K, in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Use of NonGAAP Financial Measures

In evaluating Canaan's business, the Company considers and uses adjusted net income as a supplemental measure to review and assess its operating performance. The presentation of this non-GAAP financial measure is not intended to be considered in isolation or as a substitute for financial information prepared and presented in accordance with U.S. GAAP. The Company defines adjusted net loss as net loss, excluding share-based compensation expense.

Canaan believes that adjusted net income helps to identify underlying trends in the Company's business that could otherwise be distorted by the effect of the expenses that the Company excludes in adjusted net income. The Company believes that adjusted net income provides useful information about our operating results, enhances the overall understanding of Canaan's past performance and future prospects and allows for greater visibility with respect to key metrics used by the Company's management in its financial and operational decision-making.

The non-GAAP financial measure "adjusted net loss" is not defined under U.S. GAAP, is not presented in accordance with U.S. GAAP and has limitations as an analytical tool. One of the key limitations of using adjusted net loss is that it does not reflect all of the items of income and expense that affect the Company's operations. Share-based compensation has been and may continue to be incurred in Canaan's business and is not reflected in the presentation of adjusted net loss. Further, the non-GAAP financial measure "adjusted net loss" may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.
